**DE - OILING,
DECONTAMINATION,
POLYURETHAN AND
EPOXY RESIN , COATING**

for Industrial surfaces and trade areas

Future solutions today :

Cleaning of, with oil or other parting agents dirty concrete and concrete block surfaces (timber floorings, tiles, Plastics surfaces and metal), also with fire damage.

Remove from surface layer (feast, old coating) by most modern sand – and shot - peening technique. Dust free execution.

Decontamination of PAK, MKW, PCB, CKW, acids, chemicals and animal fats.

De – oiling by biologically degradable liquid, without destroying the surface.

Epoxy resin, PU and PMMA plastics as mortars or coating. Resistant to chemicals, acids, oils, rust, thawing salts and extremely resistant against extreme loads.

Ground condition analyses, create from fixed soils for the regulation of : Concrete quality, adhesive strength, pressure strength and residual moisture content.

Trade & Service

You will, probably buy your bonding agents and industrial cleaners separately, however to have them the possibility of us, non standard on its application, both exactly, of keeping coordinated.

- ? Biologically degradable liquid to the cleaning of soils and walls, when contamination due to oil.
- ?
- ? Special liquids for the removal of pollution at machines or machine parts, also with synthetic oils and fat mixtures.
- ? Any type of bonding agents for, for example absolutely dust free application up to swimming bonding agents.
- ? Fabric bonding agent in the form of cloths, mats, roles, cushions and oil barriers in different size.
- ? Oil defense – and cleaning container for de – oiling / cleaning of tank surfaces.
- ? The final consumers clean box for the distance of oil - , gasoline or diesel marks.

Coating for industrial surfaces and trade areas!

See appendix.

Stocktaking of oiled and dirty fixed soils!

- ? Create to a ground condition analyses with consideration of the further handling and later use.
- ? Adhesive strength, pressure strength
- ? Residual moisture content, important for PU – coatings, investigation on steam pressure.
- ? Concrete quality.

Decontamination / De – oiling of industrial surfaces and trade areas!

- ? As preparing measure with coatings or top course concrete work.
- ? Industrial cleaning projects.
- ? Decontamination of concrete (lower the value of MKW) with pending disposal / utilization..
